Cost Management in Shipbuilding

1-Day Training CostFact Basics

Brick and Mortar Course with Practical Software Handling

31st May 2017 in Hamburg (Germany) from 9:00 to 17:00

Topic

The software system "CostFact" supports cost planning from early design and engineering stages on, combining top-down with bottom-up costing approaches. Developed in close cooperation with some of the world's leading shipyards, CostFact provides a number of best-practice methods, covering all of a shipyard's calculation demands.

Training Course

The one-day course "Training CostFact Basics" will offer the opportunity to learn and exercise the most important features of this system and to explore CostFact's capabilities in practice. After a short introduction that gives an overview on the system, most of the day is reserved for tangible usage: Guided by a step-by-step instruction and a tutorial, the participants follow a systematic demonstration on training workstations with full versions of CostFact and provided sample data. The cycle of an entire calculation process will convey CostFact's look and feel character that allows to perform most of the tasks intuitively. Each participant will work on his own computer. The number of attendees is limited to eight persons which will allow to address individual demands properly.

Training Scope

The course includes all main functions of CostFact's basic module, namely:

➔ Creating new projects and administer calculations
➔ Re-using historical data to set up new cost prognoses efficiently
➔ Parametric cost estimation
➔ Assessing the reliability of cost estimations
➔ Integration of the specification into projects
➔ Managing Change Orders
➔ Regression analyses based on reference projects
➔ Cost Analysis and Cost Reporting including the controlling of cost targets

Who Should Attend?

If you are looking at CostFact the first time, this course will be the fastest way to evaluate this system and to assess its value for your costing processes. If your company is already working with CostFact, you will benefit from the systematic training to polish up your knowledge and user skills.

Date and Registration

The training takes place in Hamburg, Germany, on 31st May 2017 from 9.00 to 17.00. Detailed venues will be emailed to registrants.
The attendance requires a registration by 9th May 2017.

PROJECT TOTAL	+8 %
ENGINEERING	-15 %
HULL STRUCTURE	+35 %
OPERATION SUPPORT	+56 %
SHIPLOAD EQUIPMENT	-11 %
CONSERVATION	+15 %
PROPULSION PLANT	+22 %
AUXILIARY SYSTEMS	+33 %
SHIP ASSEMBLY	-43 %
ELECTRIC PLANT	-2 %
